

# FUNDAMENTALS OF IBM RATIONAL FUNCTIONAL TESTER v8.0

TestPro is a leading software testing consultancy that specialises in test management, automation, performance / load testing and employee development. We pride ourselves on our knowledge, experience and technical capabilities within the testing arena.

## Who is the training for?

This training has been designed for the following participants:

- Test Analysts
- Test Leads
- Test Managers
- Test Specialists and
- anyone interested in test automation.

## Course Pre-requisites

Participants should have a basic understanding of Java and web applications, windows operating systems and applications, testing processes and programming principles.

## What are the associated benefits?

Participants will not only find the course to be more cost effective in comparison to other training companies, but will be able to experience a more practical display of how to use the tool for its intended purpose.

Participants will also be able to build, enhance and maintain scripts.

TestPro not only has its own training venues, we can also arrange on-site training for small groups, at a time convenient to you and your project.

## How is the course structured?

The course is structured in easy to learn modules that will assist participants towards understanding and using the tool in its simplest form the way it was intended to be used.

## What will we cover?

Upon completion of this course, participants will be able to:

- Describe the function and purpose of IBM Rational Functional Tester
- Navigate the interface
- Record and Playback automated scripts
- Modify scripts to extend the capability to test the application
- Apply and Control object maps
- Create data driven tests

## Course Costs

The cost of this two day course costs \$1300 + GST per participant. Discounts apply for group bookings.

## Location

Courses are held in Sydney CBD, locations are shown in the course timetable.

Group bookings can be arranged to be held at your place of work.
